

Read me

1.The code is implemented in Python3.

2.Only standard libraries are used.

3.Running the code:

- On terminal -> python3 proj_code.py
- Select the command which you wish to perform by pressing 1-6 key.
- It is recommended to use peer command first and form a Network topology.
- When you wish to exit the application give a keyboard interrupt by pressing Control+C (linux) or Control+Z (windows).
